RESEARCH INTERESTS	My research interests are in signal and image processing broadly and improving the quality of magnetic resonance imaging specifically. My thesis work concerns improving the quality of pediatric MRI scans for the purpose of cancer screening. This work spans biophysics, RF pulse design, image reconstruction algorithms, and clinical implementation, all with the purpose of advancing human health care.	
EDUCATION	<b>Stanford University</b> , Stanford, California, USA Ph.D., Bioengineering, <i>expected 2016</i> <ul style="list-style-type: none"><li>• Advisor: John Pauly</li><li>• Minor: Electrical Engineering</li><li>• Thesis: Robust body diffusion weighted magnetic resonance imaging</li></ul> M.S., Bioengineering, June 2013 <ul style="list-style-type: none"><li>• Concentration: medical imaging and signal processing</li></ul> <b>University of Utah</b> , Salt Lake City, Utah, USA B.S., Biomedical Engineering, May 2011 <ul style="list-style-type: none"><li>• Electrical engineering specialization (signal processing and medical imaging)</li><li>• Minor: Mathematics</li><li>• Thesis: Correlation-based retrospective concatenation of multi-volume 3D microCT data</li></ul>	
AWARDS	<ul style="list-style-type: none"><li>• ISMRM Educational Stipend Award, 2013, 2014, 2015, 2016</li><li>• National Science Foundation Graduate Fellowship, 2012</li><li>• Stanford University School of Engineering Dean's Doctoral Diversity Fellowship, 2011</li><li>• University of Utah College of Engineering Arel Berrier Scholarship, 2010</li><li>• University of Utah Barry M. Goldwater Scholar Nominee, 2010</li><li>• University of Utah Presidential Scholarship, 2005 - 2011</li><li>• Member of Tau Beta Pi, 2009 - Present</li><li>• Eagle Scout, 2003</li></ul>	
TEACHING EXPERIENCE	<b>Stanford University</b> , Department of Electrical Engineering, Stanford, California  <b>EE102A: Signals and Systems</b> Sophomore and junior level course in continuous- and discrete-time signal and system analysis.  <i>Primary Instructor</i> Summer 2015, Summer 2016 Developed syllabus, created homework, taught lecture, held office hours.  <i>Teaching Assistant, with John Pauly</i> Winter 2013, Winter 2014, Winter 2016 Held office hours, held recitation sessions, lectured occasionally.  <b>EE369B: Medical Imaging Systems II</b> Graduate level course on imaging internal structures within the body from a systems viewpoint.  <i>Teaching Assistant, with Dwight Nishimura</i> Spring 2016 Held office hours, held recitation sessions, lectured occasionally.	

## **EE369C: Medical Imaging Reconstruction**

Graduate level course on medical imaging reconstruction problems.

*Teaching Assistant, with John Pauly*

Fall 2015

Held office hours, mentored class projects.

**University of Utah**, Department of Biomedical Engineering, Salt Lake City, Utah

## **BIOEN 3900**

Sophomore and junior level course in signal processing and analysis with biomedical applications.

*Teaching Assistant, with Edward Hsu*

Spring 2011

Graded, held office hours, held recitation.

## **BIOEN 5101**

Junior and senior level course in electronics and signal processing with biomedical applications.

*Teaching Assistant, with Edward Hsu*

Fall 2009, Fall 2010

Developed an entirely new laboratory component for the course, graded, held office hours, held recitation, lectured occasionally.

## **POSITIONS**

**Stanford University**, Stanford, California USA

*Graduate Research Assistant,*

April 2012 to Present

Developed a rapid diffusion-weighted MRI sequences for pediatric imaging cases. Pulse sequence development included RF pulse design and reconstruction techniques. This work resulted in a robust protocol that is used routinely at Lucille Packard Children's Hospital at Stanford.

**MedWhat**, San Francisco, California USA

*Consultant/Technical Advisor,*

November 2015 to Present

Developed novel machine learning algorithms for the purposes of computer vision and natural language processing. In particular, used convolutional neural network algorithms to identify dermatological conditions and developed a robust question-answer system for questions in the medical domain.

**University of Utah**, Salt Lake City, Utah USA

*Edward W. Hsu Research Group*

December 2009 to June 2011

Worked to improve dynamic imaging resolution through higher order reconstruction. Developed cross-correlation volumetric stitching algorithm for CT volumes. Ran CT scanner as well performed image analysis on CT volumes.

*Center for Neural Interfaces*

December 2008 to November 2009

Developed a neural cuff to hold Utah Slant Electrode Array in place while also providing electrical shielding. Conducted over 60 small animal (Fischer rat) surgeries to implant the device. Monitored post surgery walking behavior, explantation, and perfusions to verify biological response to cuff.

*University of Utah Nanofab*

July 2008 to August 2009

Specialized on environmental scanning electron microscopy. Characterized biological materials through various surface analysis tools.

## **PUBLICATIONS**

- [1] E. Gibbons, P. Le Roux, J. Pauly, and A. Kerr, "Slice profile effects on nCPMG SS-FSE," *Magnetic Resonance in Medicine*, Accepted, in revision.
